NATURE CENTRED. SCIENCE DRIVEN

Dr. Nathan Bryan and his research team reveal the untold story of this remarkable heart and circulation breakthrough...

The way doctors can now view heart issues... stiff arteries... poor circulation... dwindling sexual enjoyment... and low energy levels may save the health and lives of millions, including yours. *And it all started with a simple question...*

What if?

Dear friend...

What if you could release the power of ONE amazing **"Miracle Molecule"** in your body and INSTANTLY experience a dramatic improvement in your health?

My name is Dr. Nathan Bryan, and I'm about to reveal to you a simple, all-natural, potent, scientifically-tested remedy that can help you finally restore your health, especially if you are struggling with...

- **Blood pressure**
- **Narrowed arteries**
- **Energy Drain**
- **Poor sexual performance**

So what is this **"Miracle Molecule"** that over 130,000 published papers, clinical studies, and medical trials are calling the "secret weapon" for preventing and reversing heart and circulation disorders?

It's called **Nitric Oxide**, "N-O" for short! Nitric oxide is a critical, powerful, and potent messenger gas molecule that penetrates cells and sends signals to get your cells to take action.

For Example, it's N-O that:

Signals the muscles around your arteries to relax, so they can widen and expand blood vessels!

Increases blood flow! Directs immune cells to kill unfriendly bacteria and abnormal cells. Keeps brain cells communicating with each other!

In fact, N-O sends crucial signals with EVERY cell tissue and organ in your body! Without these signals...

...It's like being at a 4-way stop light during rush hour, and all the lights stay red! Nobody moves. Nothing gets going, and you've got a messy pile-up! That's just how powerful the signaling power of N-O is. N-O gets your body in action, and that's why you need an adequate supply for optimal health!

But here's the kicker:

As you get older, and now scientist are saying especially after you reach 40, your N-O levels become critically low. In fact, one study by Japanese researchers found a 75% decline in nitric oxide levels in people 70-80 years old as compared to 20 year olds!

So it's no wonder your body is breaking down, even if you're watching your weight, eating right, and trying to exercise! Your body doesn't have enough N-O to signal your cells to get off their butts and get the work done!

THE NEW YORK TIMES

"The discovery of Nitric Oxide is one of the most important in the history of cardiovascular medicine."

—Dr. Valentin Fuster 1998 President of the American Heart Association, reported in The New York Times

36 out of 36 Cardiologists, M.D.s, and Scientists agree this is THE health breakthrough of the decade!

Nobel Prize Winning Scientists Identify "Circulation Switch" in Your Body...

It works in just minutes and delivers proven support for: ■ Healthy heart and blood pressure.

■ Astonishing all-day energy. ■ Healthy blood flow to the brain. ■ Healthy triglycerides.

■ Sexual enjoyment. ■ Flexible arteries. ■ And much more...

Without enough N-O:

White blood cells and platelets can become sticky and start the buildup of plaque! So now you've got the potential onset of heart issues and blood pressure problems!

Smooth muscle cells of the artery wall can start multiplying and creating plaque! And your triglyceride levels shoot through the roof! Inflammation and oxidation can start to damage arterial walls and promotes even more plaque! That's giving you stiff arteries! Brain cells may not receive proper signals to communicate properly. Or worse, brain decay sets you up for age-related memory problems!

One of N-O's most important signaling functions is within your circulatory system! Without adequate levels of N-O, your arteries can't expand and relax properly, blood flow is impaired, and cells are starved of nutrients, and cholesterol and triglycerides buildup in your cells and create artery-narrowing plaque!

So how do you get enough N-O?

If you're taking L-arginine to boost your N-O levels, you're in for a shocker. Take a look...

One of the main ways nitric oxide is produced is in the lining of your arteries called the endothelium. And research

shows the amino acid called L-arginine is converted to N-O in the endothelium.

So, it makes sense that most nitric oxide supplements currently on the market are using L-arginine to increase nitric oxide levels. But here's the problem...

...If you're under 40, very healthy, and have no heart or circulation related issues, L-arginine supplements may work. But if you're over 40, have a history of heart-related problems, high blood pressure, have cholesterol imbalances, are overweight, or are in mediocre to poor health, you might as well chuck your money down the drain, because L-arginine won't work for you.

In fact, if you've tried L-arginine supplements, you probably already know they didn't work and here's why:

L-arginine is a very popular amino acid and plays many important roles in the body.

For example,

L-arginine is used to make proteins, energy, hormones, and neurotransmitters. So, it's quickly snatched up by eight different bimolecular pathways in your body, long before L-arginine can be turned into nitric oxide.

What's more...

...After age 40, your endothelial function diminishes. So, it becomes even more difficult for your body to convert any L-arginine that's left over into nitric oxide. That's one reason you're deficient of N-O in the first place! So taking in more L-arginine won't amount to a hill of

Continued on page 4

If you're
over
40

You
need
to know
this

beans for optimum nitric oxide productions! What's more...as you get older, your body can't tolerate L-arginine supplements properly, so it's common to experience nausea, upset stomach, and digestive problems. That's your body telling you taking MORE L-arginine won't get the job done!

So how do you get more N-O?

You need a direct route to boost your nitric oxide levels. A path that won't tax or upset your already overworked body! There are over 130,000 published papers on nitric oxide, and I've written more than 60 of those papers myself! And what I've discovered is while the main production of nitric oxide occurs in the endothelium, this pathway is far less effective at producing optimum levels of N-O by the time you're in your 40's.

Fortunately, it's been recently discovered that your body has a secondary pathway for N-O production that's far more effective for folks over 40. I call it the **"N Factor"** pathway because it uses nitrogen type molecules (N) to create nitric oxide. But here's the great news...

This N factor pathway for producing higher N-O levels can be easily activated with the saliva in your mouth! That's another reason why swallowing a nitric oxide pill, capsule, tablet, or powder that bypasses the utilization of saliva, sending it straight to your digestive tract, wipes out most of the benefits you can hope to experience.

For the past 10 years, my research team and I have worked exclusively on a technology to create a delivery system that helps you optimize nitric oxide production through the more effective N Factor pathway.

This patented delivery system has now been shown to improve nitric oxide conversion through the N Factor pathway by nearly 95%.

Please know this: Boosting nitric oxide conversion by nearly 95% through the N Factor pathway has **NEVER BEEN ACCOMPLISHED** before! But thanks to this remarkable delivery system technology, it can be done!

If Your
Nitric Oxide Levels are

LOW

or depleted

Here's what it means...

*It means that the lining of your arteries (your endothelium) may not be receiving the signals to relax and open up wide so your blood pressure and blood flow stay **HEALTHY***

And guess what?

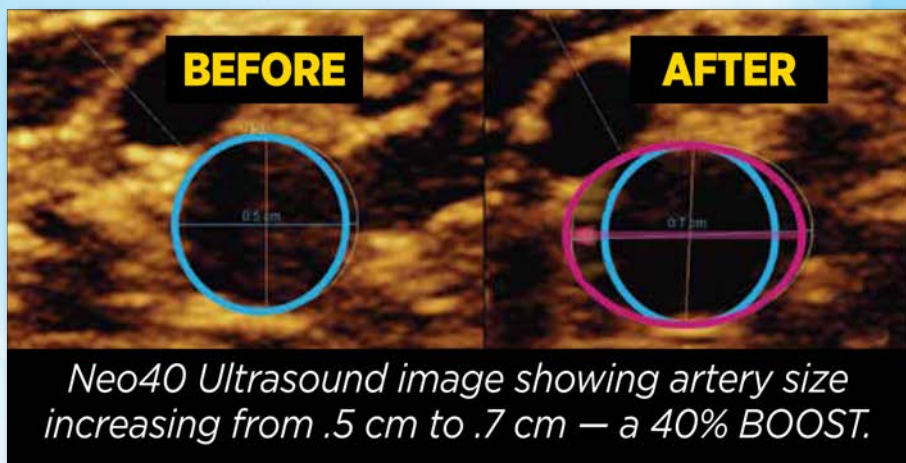

We've put this technology in a slow dissolving lozenge that's immediately activated with the saliva and beneficial bacteria in your mouth!

This remarkable formula is called **Neo40 Daily**. Quite frankly: it's this patented technology that **INSTANTLY** boost N-O production and then helps you to continue to maintain optimum levels of N-O throughout the day. That makes Neo40 Daily the only nitric oxide formula on the market that can **GUARANTEE** fast results and **DELIVER THE GOODS!**

I'm a scientist and I wanted absolute proof that this delivery system truly worked...

Continued on page 6

“I’ve never seen such a dramatic result in such a short time!”

Those are the actual words of a man named Martin Stivers, a thermal imaging technician who monitored the benefits of boosting *nitric oxide* in real time. (Mr. Stivers confirmed these results in *writing*. You can read his words later in this report.)

Here’s how the test worked...

First, the test subject was instructed to take Neo40 daily in the morning and evening...

Neo40 is a ground-breaking formula designed to help restore the healthy levels of nitric oxide you had when you were in your 20s or 30s.

After taking *Neo40*, the test subject was monitored on a *minute-by-minute* basis in real time. And as the images unfolded, the technician sat dumbfounded.

You could SEE blood flow improving...

As the seconds ticked by, he could SEE healthy blood flow returning to the test subject’s brain, upper body, and even the tips of his fingers.

When asked how he felt, the test subject said “I feel BETTER!”

Later on, the technician wrote:

“There is no doubt in my mind... *Neo40* was definitely enhancing his blood flow in the large vascular pathways to the head and brain.”

But that’s just the beginning of this amazing story.

So my team of researchers put Neo40 Daily through long and grueling tests.

The results?

In a double-blind placebo-controlled clinical trial, Neo40 Daily was shown to increase N-O levels almost instantly! What's more, Neo40 Daily delivers higher levels of nitric oxide than any L-arginine supplements for folks over 40!

That's because Neo40 Daily lozenge allows the good bacteria and saliva in your mouth to activate nitric oxide function. So you get an immediate and significant boost of N-O, in less than 30 minutes! Using thermographic imaging, you can see for yourself how your body can immediately react positively to this boost of nitric oxide.

Here's what makes Neo40 Daily such a phenomenal heart and health saver! NEO40 Daily is a TOTAL nitric oxide generating formula that works in 2 phases:

PHASE 1: as the Neo40 Daily lozenge dissolves in your mouth, saliva and beneficial bacteria activates the lozenge to immediately create nitric oxide. That's right, you're producing N-O as soon as the great-tasting lozenge melts in your mouth!

That's why you start to feel better FASTER! You can only get that immediate boost of N-O with our exclusive technology that creates this patented delivery system found exclusively in Neo40 Daily!

PHASE 2: Neo40 Daily also contains critical nutrients to create sustained N-O production in the endothelium. These nutrients include: L-citrulline, Beetroot powder, hawthorn, vitamin c, vitamin b12, and magnesium.

When combined in the Neo40 Daily formula, these nutrients work synergistically to help your body sustain N-O production so you can improve artery health, enhance blood flow, maintain healthy blood pressure and cholesterol, and boost energy levels!

With daily usage, Neo40 Daily can help BOOST and RESTORE the N-O your body desperately needs. And with continued use, there's no doubt, you'll be able to maintain your health and vitality.

DAILY MAINTENANCE of your N-O levels with Neo40 Daily is vital to help your body naturally generate the N-O you need to enjoy great health and life to the fullest! Because better circulation means better living!

Continue to maintain your healthy N-O levels with Neo40 Daily, the ONLY Patented Nitric Oxide delivery system on the market today, backed by 10 years of science, development, and clinical research!

Remember, Neo40 Daily twice a day to restore and once a day to maintain!

WIDER IS BETTER for your arteries!

KEEPS ARTERIES
FLEXIBLE, too!

Neo40 helps arteries
RELAX for healthy blood
pressure and flow, healthy
triglycerides and cholesterol...
and more.

Improve Intimacy

By Dr. Nathan S. Bryan

Healthy blood flow is vital to sexual enjoyment.

That's what those pills you see advertised on TV do. They rely on nitric oxide to help enhance sexual function and performance.

Neo40 works the same way. By boosting *nitric oxide* and blood flow to *every part of your body*, the result is increased pleasure for both men and women.

Constantly cold hands are a sign of poor blood flow...Neo40 can help!

Within 30 Minutes, the test subject had better blood flow and WARMER HANDS...

By Dr. Nathan S. Bryan

Are you one of those people whose hands and feet are cold, even in summer?

You're not alone! Millions of people have this problem. You can blow on them, sit on them, and buy the best gloves on Earth but it won't really help.

The secret is to work from the *inside out* and help boost blood flow to your fingers and toes. That's why you need *Neo40*. In the thermographic

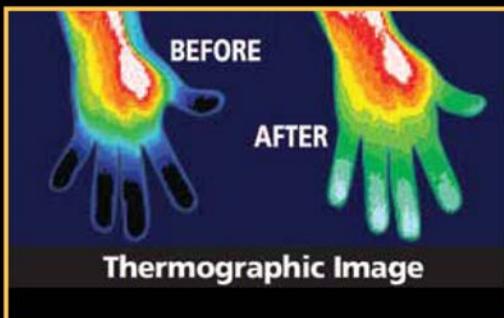

image below, you can actually *see* the improvement after just one dose and 30 minutes of elapsed time.

That's better than any hand-warmer on earth

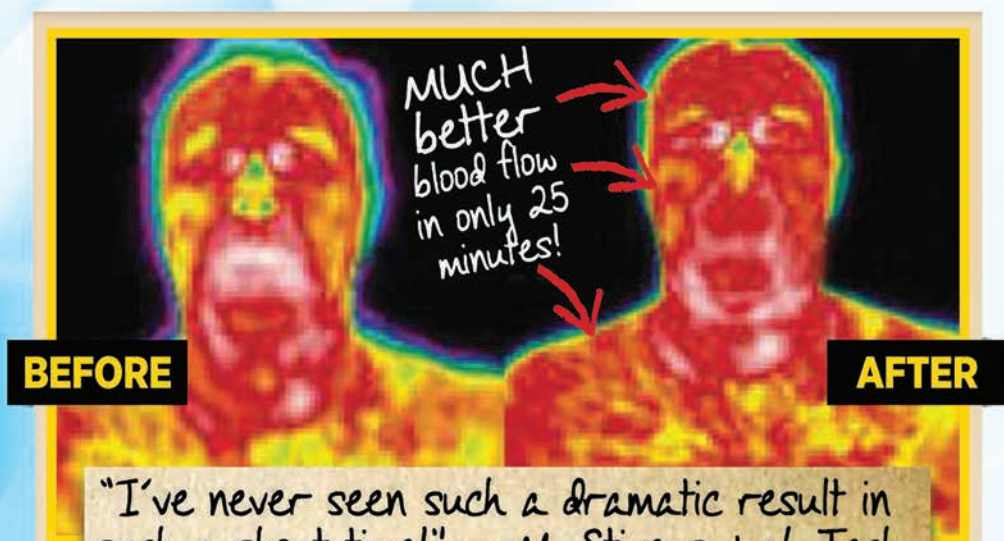

Within minutes, the test subject's hands showed better circulation and felt warmer...

After just ONE dose of Neo40, improved circulation is often reported.

Vital For A Healthy Cardiovascular System

"I've never seen such a dramatic result in such a short time!" --M. Stivers, Lab Tech.

This is a real-time, thermal scan that reveals increased blood flow using Neo40.

The result? A profound, healthy improvement for...

- Blood Pressure
- Triglycerides
- Circulation
- Cardio Health
- Energy Levels
- Sexual Enjoyment
- Brain Power
- Arteries
